

Stucco Inspection

The value of Stucco inspections is the ability of the inspector to:

- Identify & explain why there "may or may not" be issues.
- Determine the level of concern that "may or may not" exist.
- Advise you of options you may have and provide you with specifications to assure you that any current problems will not reoccur.
- Provide intrusive, nondestructive inspections.
- Generate a report that will document with pictures and narrative to show what and where issues (if present) may be.
- Bottom line --- Provide you peace of mind!
